

Human SIRP alpha V5 Protein

Cat. No. SRP-HM4V5

Description

Source	Recombinant Human SIRP alpha V5 Protein is expressed from HEK293 with His tag and Avi tag at the C-Terminus. It contains Glu31-Arg370(S42F).
Accession	P78324 variant 5
Molecular Weight	The protein has a predicted MW of 40 kDa. Due to glycosylation, the protein migrates to 50-70 kDa based on Tris-Bis PAGE result.
Endotoxin	Less than 1EU per µg by the LAL method.
Purity	> 95% as determined by Tris-Bis PAGE > 95% as determined by HPLC

Formulation and Storage

Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water.
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -20 to -80°C for 3-6 months in unopened state after reconstitution. 2-8°C for 2-7 days after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

Signal regulatory protein α (SIRP α) is a regulatory membrane glycoprotein from SIRP family expressed mainly by myeloid cells and also by stem cells or neurons. SIRP α acts as inhibitory receptor and interacts with a broadly expressed transmembrane protein CD47 also called the "don't eat me" signal.

Assay Data

Tris-Bis PAGE

Human SIRP alpha V5 on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Assay Data

The purity of Human SIRP alpha V5 is greater than 95% as determined by SEC-HPLC.

ELISA Data

Human SIRP alpha V5, His Tag ELISA

0.1µg Human SIRP alpha V5, His Tag Per Well

Immobilized Human SIRP alpha V5, His Tag at 1µg/ml (100µl/Well). Dose response curve for Human CD47, hFc Tag with the EC50 of 39.1ng/ml determined by ELISA.
